Languages: C, Java, JavaScript
Technologies: Node.js, Express.js, React.js, Tailwind
Database: MongoDB

Projects

Blogging websites (MERN)

- A blogging platform where users can create accounts by signing up using their Google account or by using their email address and password. This provides a simple and secure way to manage access.
- Users can manage their profiles, comment, like, and reply to comments on blogs. Additionally, they can create and publish their own blogs, including the ability to delete or update them.
- The platform includes a modern text editor for writing and formatting blogs with image uploads, customizable headings, and more. Users are notified of new blogs and interactions on their comments.

Note Taking Website

- Note Taking website has built with features like creating, updating, deleting, and managing notes. The website is developed using Bootstrap, Node, Express, EJS, and MongoDB.
- It also includes sign-up and sign-in functionality via email/password or Google, enabling users to securely access and manage their notes.

Certifications

- Udemy – Full Stack Web Development using MERN
