Database: MongoDB

PROJECTS

Note Taking Website   September, 2023
MongoDB, Express, EJS, Node & Bootstrap
- Note Taking website has built with features like creating, updating, deleting, and managing notes. The website is developed using Bootstrap, Node, Express, EJS, and MongoDB.
- It also includes sign-up and sign-in functionality via email/password or Google, enabling users to securely access and manage their notes.

Blogging websites (MERN)   August, 2024
MongoDB, Express, React, Node & TailwindCSS
- A blogging platform where users can sign up via Google or email/password, manage profiles, create, update, delete blogs, and interact through comments, likes, and replies.
- Features a modern text editor with image uploads and formatting options, along with notifications for new blogs and comment interactions.

Job Finder Mobile Application   February, 2025
React Native, JSearch API
- A React Native job search app where users can sign up with Google, browse jobs across various fields, and apply via direct links to company websites.
- Job listings are sourced from the JSearch API, aggregating opportunities from platforms like LinkedIn and Internshala with domain-based filtering.
